PROFESSIONAL SUMMARY

M.S. in Business Analytics graduate with 4+ years of experience applying analytics to pharmaceutical distribution and supply chain operations. Experienced in using SQL, Python, Tableau, Power BI, and R to build interactive dashboards, demand forecasting models, and predictive analytics solutions that improve operational decision-making.

EDUCATION

M.S. Business Analytics - California State University, Sacramento Specialization: Data Analytics, Machine Learning, Statistical Modeling, Business Intelligence	June 2025 Sacramento, CA
B.B.A - Institute of Business Administration, Karachi Specialization: Finance	June 2021 Karachi, Pakistan

WORK EXPERIENCE

Operations Manager Jawed Traders	June 2021 – Present Karachi, Pakistan
- Designed and implemented a Python based demand forecasting model using time series analysis to optimize inventory planning, reducing stockouts by 30%. - Developed an interactive Tableau Business Intelligence dashboard to monitor sales, inventory, lead times, safety stock, and operational KPIs, enabling data driven procurement decisions. - Reduced lead time by 25% through demand forecasting and data driven inventory planning. - Managed pharmaceutical distribution for 100+ hospitals while collaborating with suppliers including GSK, Pfizer, and Abbott to maintain inventory availability and regulatory compliance	
Supply Chain Associate GoZayaan	Jan 2020 – June 2021 Karachi, Pakistan
- Supported the launch of two products by analyzing vendor data, pricing terms, and service capacity. - Managed relationships with 20+ local and international vendors to ensure timely service delivery. - Analyzed vendor pricing and performance data to support negotiations and improve responsiveness.	

PROJECTS

Business Intelligence & Forecasting Solution <i>Python, SQL Server, Tableau, Tableau Prep</i>
Developed an end to end BI and forecasting platform with interactive dashboards and automated reporting to optimize inventory planning and support data driven decisions.
Loan Default Prediction <i>Python, Scikit-learn, Pandas</i>
Developed and evaluated loan default prediction models using feature engineering and Random Forest classification to identify high risk borrowers and support credit risk assessment.
Cardiovascular Disease Risk Prediction <i>Python, Scikit-learn, Pandas</i>
Built and evaluated Logistic Regression, Random Forest, and SVM models for cardiovascular disease risk prediction using feature engineering and performance-based model selection.

TECHNICAL SKILLS

Programming: Python, R, SQL
Data Analysis: Pandas, NumPy, Excel
Visualization: Tableau, Power BI, Matplotlib, ggplot2
Statistical Analysis: Regression, Hypothesis Testing, Forecasting
Machine Learning: Scikit-learn, Random Forest, Decision Trees, Neural Networks, Feature Engineering, Model Evaluation, Time Series Forecasting
